

Dr. Danielle Rose, Board Member

Dr. Danielle Rose came onto Dogs for Better Lives' national board in Fall 2018.

Dr. Rose is an MD Physician and joined Salisbury Pediatric Associates in 2012. She has a special interest in special needs children and integrative medicine. Dr. Rose has studied with several Naturopathic physicians and integrates supplements, herbs and homeopathic treatment into her pediatric treatment plans.

Dr. Rose completed her undergraduate studies at Salem College and medical studies at Medical College of Georgia followed by the completions of her internship and residency at Wake Forest University Baptist Medical Center.

Since 1996, Dr. Rose has been a Hearing Dog client of Dogs for Better Lives. Now with her third Hearing Dog Delight, a 3-year old black Labrador, Dr. Rose continues to be alerted to the phone, smoke alarm, oven timer, alarm clock, name call, and door knock. Delight does this by tapping Danielle's leg with her nose and then leading him to the sound. With bringing her Hearing Assistance Dog to work each day, Delight is not only able to benefit Danielle, but also comfort the young patients she visits with who may have anxieties about visiting the doctor's office.

In addition to being a Dogs for Better Lives' client, Dr. Rose also serves as a *National Ambassador* for DBL, regularly presenting about the organization to local and regional community groups, such as her state chapter of Hearing Loss Association of America.

Dr. Rose is excited about Dogs for Better Lives' development of their Autism and Facility Dog programs for people who experience Autism and other disabilities. Serving as a Board Member for Dogs for Better Lives is providing Dr. Rose with a wonderful opportunity to speak with community groups about the value of an Assistance Dog and how they better people's lives, including her own.

Dr. Rose lives in Mooresville, NC with her husband Cameron, Hearing Assistance dog Delight, and their cat Earl Gray.
